

# Akari Oh

a4oh@ucsd.edu | (858) 370 – 2173 | [www.linkedin.com/in/akari-oh/](https://www.linkedin.com/in/akari-oh/)

## EDUCATION

**University of California, San Diego**

Sep 2023 – June 2027

*B.S. in Mathematics-Computer Science, Minor in Interdisciplinary Computing and the Arts & Japanese Studies* GPA: 3.9/4.0

**Relevant Coursework:** Data Structure and Algorithms, Software Engineering, Computer Graphics

## TECHNICAL SKILLS

**Languages:** Python, JavaScript, TypeScript, HTML, CSS, Swift, Java, C/C++

**Frameworks:** React.js, Node.js, Next.js, Express.js, SwiftUI, RESTful APIs, RAG, MongoDB, PostgreSQL

**Tools:** Git, Agile/Scrum, AI Agents (Claude Code & Codex), Xcode, Supabase, Figma, Office Suite, Blender

**Professional:** Mandarin (Native), English (Fluent), Japanese (Proficient)

## EXPERIENCE

### StepFun

Shanghai, China

*AI Engineer Intern (Remote)* | AI, API, React, TypeScript, Git, Claude Code

July 2026 – Present

- Eliminated unauthorized access to admin-only features (API-key, pricing) across a customer-facing AI gateway dashboard fronting 40+ LLM providers, as measured by full enforcement of role-based permissions at the routing layer, by designing RESTful route guards and orchestrating Claude Code to implement code-level access control
- Isolated the root cause of intermittent failures across a production LLM API gateway, as measured by clear fault attribution between the upstream provider and gateway infrastructure, by building AI-agent-assisted Python test harnesses that quantified error rates and tail latency

### Timewitch Inc.

Tokyo, Japan

*Software Engineer Intern (Hybrid)* | Backend API, Automation Workflows

May 2025 – Oct 2025

- Reduced turnaround time on client requests for AI-generated PowerPoint decks, as measured by enabling asynchronous processing across the US–Japan time difference, by redesigning backend API endpoints around RESTful design principles and integrating them with AI automation software
- Improved front-end usability for business clients, as measured by consistent interaction and rendering quality across mobile, PC, and tablet, by building and testing responsive UI components in Studio.Design

## PROJECTS

### Kana Compass

San Diego, CA

*iOS Mobile App* | SwiftUI, Xcode, Claude Code

Aug 2026 – Sep 2026

- Enabled progressive skill-building across 4 distinct practice modes for the Japanese 12-key flick keyboard, as measured by real-time visual accuracy feedback on every input, by designing a custom swipe-gesture engine with a toggleable hint system
- Sustained user engagement in short, repeatable sessions, as measured by persistent best-score tracking across sessions, by implementing a Swift Concurrency-based countdown timer and an accuracy-weighted scoring algorithm

### HKN Projects Portal Website

San Diego, CA

*Full-Stack Website (team of 7 students)* | Next.js, React, TypeScript, CMS, RAG, CI/CD, Git

Feb 2026 – June 2026

- Built a full-stack web portal for UCSD's HKN projects branch serving 200+ members, as measured by reducing content-update friction for non-technical officers by integrating Decap CMS with Netlify Git Gateway and automatically rebuilding and redeploying the site on every code or content update with an automated CI/CD pipeline
- Kept a 7-person team on schedule across a 4-month build, as measured by on-time delivery of sprint milestones, by running the team through Scrum ceremonies (sprint planning, standups, retros) as part of a shared Agile workflow
- Increased AI chatbot resilience and response reliability, as measured by uninterrupted, context-grounded answers to member queries, by architecting a multi-LLM RAG backend (Pinecone, Gemini Embeddings) with cross-provider fallback across Gemini, Claude, and OpenAI

## LEADERSHIP

### Eta Kappa Nu (IEEE-HKN)

San Diego, CA

*Math-CS Chair of the official Engineering Student Honor Society of IEEE*

01/2026 – Present

- Grew engagement across 20–75 attendees per event, as measured by consistent quarterly turnout, by designing and executing hands-on technical workshops paired with industry-professional sessions
- Kept event delivery on schedule across multiple stakeholder groups, as measured by on-time preparation and execution of a recurring event calendar, by streamlining communication between department chairs and student organizations
